L	R	S	T	S	O	O	D	S	S	E	R	O
S	L	S	E	T	A	I	L	G	E	S	U	Y

- Eggs.
- Ocean.
- Water.
- Finds,
- Gills.
- Tail.
- Mouth
- Eyes.
- Scales.
- River.
- Ocean
- Shark
- Stingrays
- Seahorses

a. The fishes live in \_\_\_\_\_, \_\_\_\_\_.

b. The bodie of fish is covered with \_\_\_\_\_.

c. The \_\_\_\_\_ help the fish to swin.

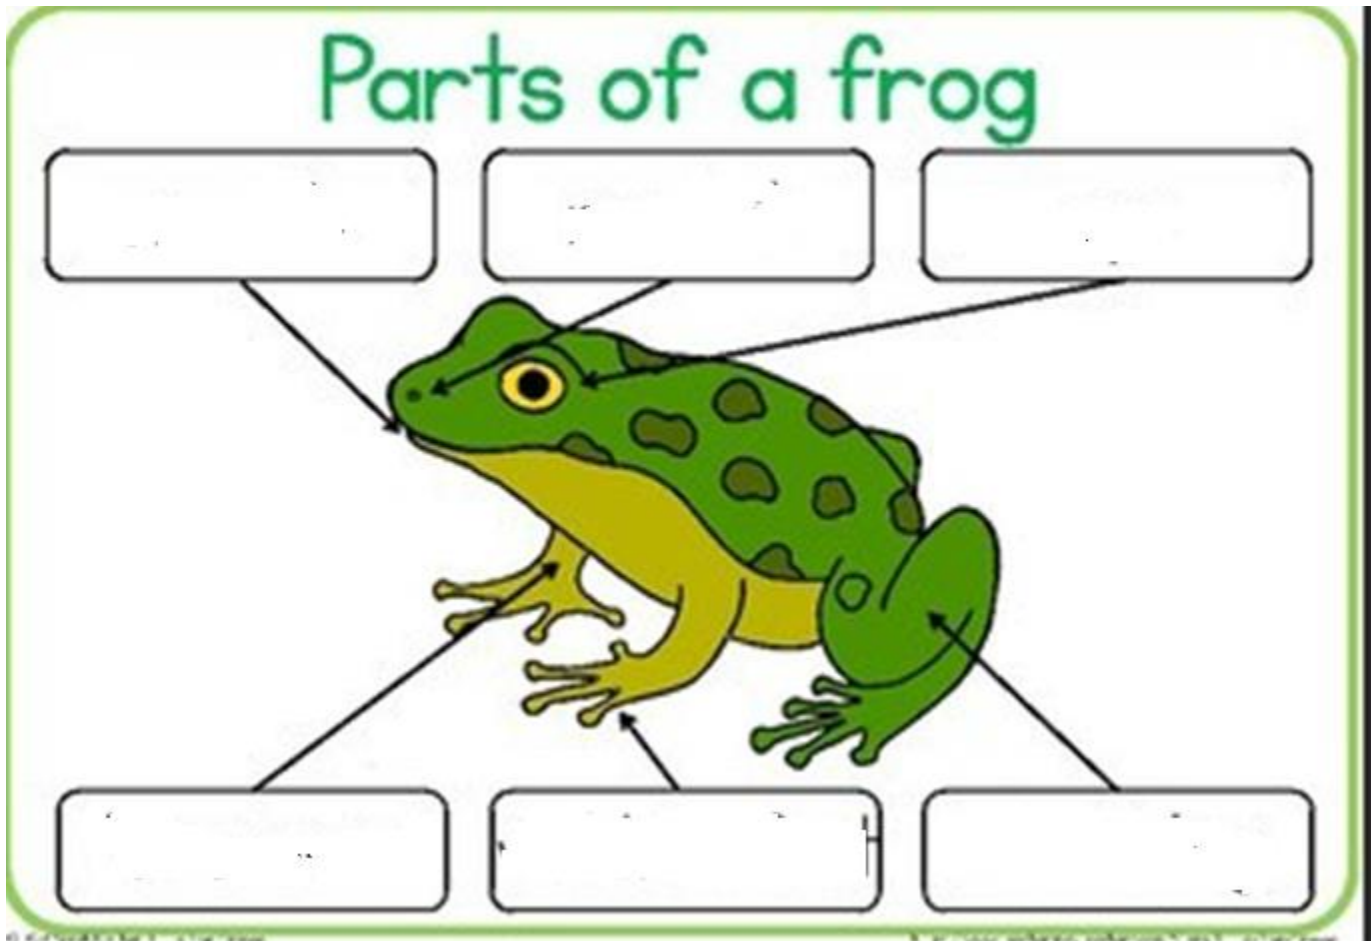

d. Examples the fish are: \_\_\_\_\_,  
\_\_\_\_\_.

e. Fish reproduce by laying fertilized \_\_\_\_\_.

3. Read the class notes and answer.

- a. The amphibians are \_\_\_\_\_ animals that spend a part of their live in \_\_\_\_\_ habitats.
- b. The tadpoles breathe through \_\_\_\_\_.
- c. Frogs and toads breathe through \_\_\_\_\_.
- d. The amphibians are oviparous and reproduce by fertilized \_\_\_\_\_.

4. Put the names in the image

5. Read the text and answer the questions

Reptiles are vertebrate animals with dry skin and scales. They have cold blood to regulate their temperature according to their habitat. Some are herbivoros, while the majority feed on other smaller animals.

Reptiles reproducee by laying eggs, which means they are oviparous, They are both land-dwelling and aquatic reptiles. Their habitats include grasslands, forests, wetlands, oceans,water and deserts.

Some reptiles have a shell like turtles and tortoises. There are also reptiles that lack limbs, like snakes.

- a. The reptiles have \_\_\_\_\_ skin and \_\_\_\_\_.
